Вводная часть

Создание своего сайта очень важно для каждого современного человека и особенно актуально для специалиста в области информационных технологий.

Цели

Целью моей работы было: написать два поста

Основная часть

Создали новый пост по прошедшей неделе в каталоге ~/work/blog, с помощью ~/bin/hugo new post/название.

```
inneustroeva@inneustroeva:~/work/blog$ ~/bin/hugo new post/last_week_4  
Content dir "/home/inneustroeva/work/blog/content/post/last_week_4" created
```

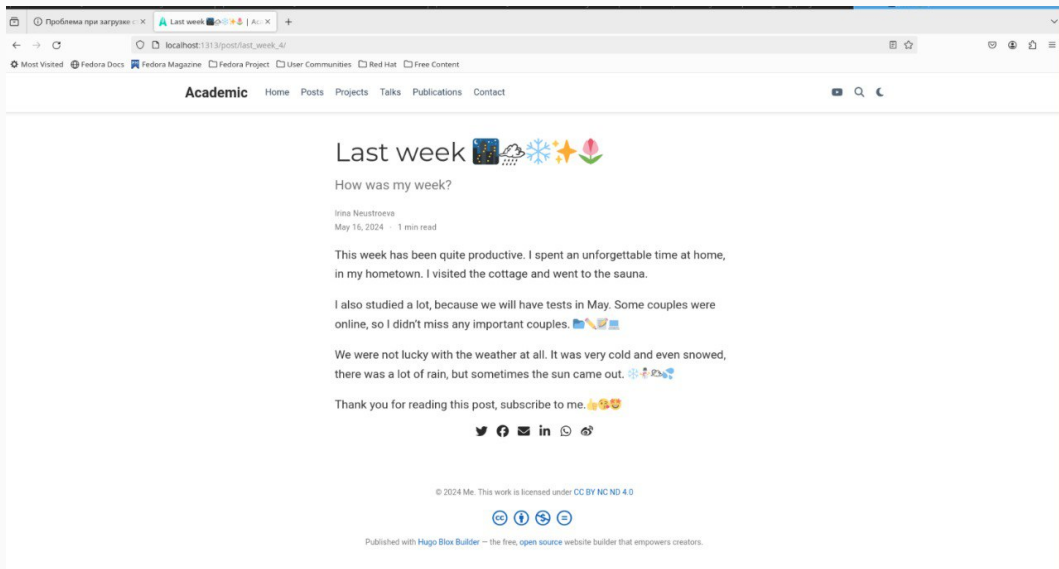

Перешли в папку `~/work/blog/content/post/last_week_4` и написали пост в папке `index.md`

31 This week has been quite productive. I spent an unforgettable time at home, in my hometown. I visited the cottage and went to the sauna.  
32  
33 I also studied a lot, because we will have tests in May. Some couples were online, so I didn't miss any important couples. 📖✍️💻  
34  
35 We were not lucky with the weather at all. It was very cold and even snowed, there was a lot of rain, but sometimes the sun came out. ❄️🌨️☀️

Вот так выглядит наш сайт теперь

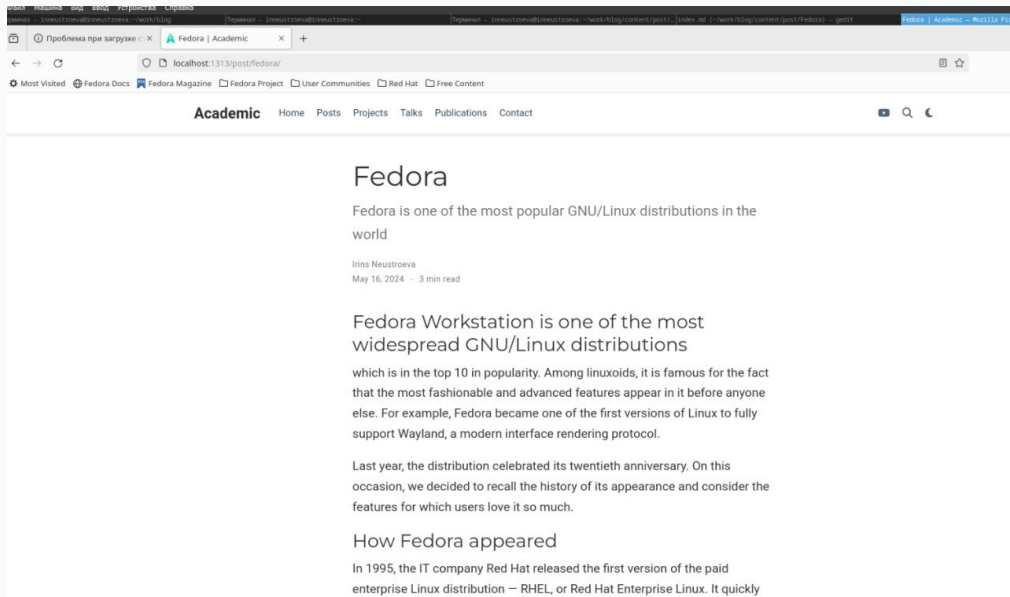

Тоже самое проделываем для поста на тему: дистрибутив Федора

Заключительная часть.

В данной работе я написала два поста

Работа над индивидуальным проектом увлекательна для меня.
